

Area: Practical Life (Care of Environment & Motor Skills)

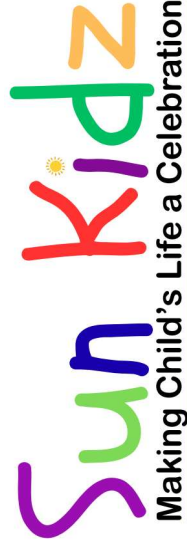

Type: Water Activity

Objectives

- Develop hand and finger strength (pre-writing skill)
- Improve hand–eye coordination
- Build concentration and focus
- Introduce control of movement
- Encourage independence and responsibility

Materials Required

- 2 small bowls (one filled with water–Use coloured water, one empty)
- 1 soft medium-sized sponge
- 1 tray (to contain spills)
- 1 small cloth or towel

EPL Activity Sheet: Sponge Squeezing

5–10 minutes per child

Step 1: Invite the Child

- Call the child calmly
- Say: “*Let’s do sponge Squeezing.*”

Step 2: Show the Setup

- Place tray neatly on the table
- Point to bowls: one with water, one empty

Step 3: Pick the Sponge

- Slowly take sponge from water bowl
- Hold it above the empty bowl

Step 4: Squeeze the Sponge

- Squeeze sponge using fingers/palm
- Let water fall into empty bowl
- Say: “*Squeeze... water comes out.*”

Skills Developed

- Fine motor development
- Wrist control
- Concentration
- Independence
- Care for environment

Step 5: Release

- Stop squeezing
- Show relaxed hand

Step 6: Repeat

- Put sponge back into water bowl
- Repeat 3–5 times slowly

Control of Error

- Water spills → child learns to control pressure
- No water comes → child learns to dip sponge again

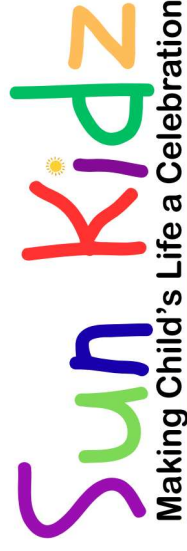

Area: Practical Life – Fine Motor, Independence
Type: Manipulative Activity

Objectives

- Strengthen hand muscles
- Develop wrist rotation
- Improve finger control and coordination
- Introduce independence skills (opening their own snack boxes, containers)
- Build concentration through repetition

Materials Required

- Water bottle – ½ liter mineral water-empty
- Push to open – children water bottle
- Flip lid (simple hinge) - Children water bottle

EPL Activity Sheet: Opening & Closing simple lids

5–10 minutes per child

Step 1: Invite the Child (Teacher to open)

- Say: “Let’s open and close the lids.”
- Carry tray to the table.

Step 2: Show the First Container

- Place it in front of the child.
Hold it with one hand and open the lid **slowly** with the other and take it out- don’t pull

Step 3: Closing Motion

- Align lid carefully
- Turn the lid to close, make sure the child observes how lid sits on top
- Say: “Close.”

Step 4: Show the Second Container

- Place it in front of the child.
- Hold it with one hand and press the lid **slowly** with the other and close

Skills Developed

- Wrist rotation
- Bilateral coordination (using both hands)
- Fine motor control
- Concentration
- Independence

Step 5: Show the Third Container

- Place it in front of the child.
- Hold it with one hand and flip the lid **slowly** with the other and close

Step 6: Child’s Turn

Offer the container and let the child try. If child struggles:

- Show again slowly
- Do NOT fix hand positions forcibly

Encourage: “Try slowly.”

Control of Error

- Lid does not fit → child realizes and corrects alignment
- Lid falls → child learns grip control
- Container moves away → child learns to stabilize with other hand

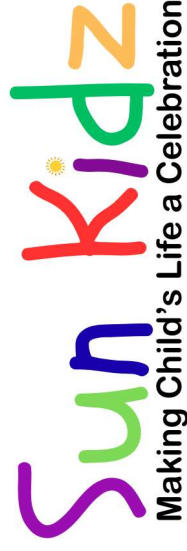

Area: Practical Life – Hand Control & Coordination
Type: Posting Activity

Objectives

- Develop hand-eye coordination
- Improve grasp and release control
- Build concentration and focus
- Encourage independence
- Introduce cause & effect (object goes in → disappears inside)

Materials Required

- 1 posting box with **big hole** (or a container with wide opening)
- Blocks, Bead Balls, Counting Rings-5 nos (Multicolors)
- 1 tray

EPL Activity Sheet: Object Posting (Big-Hole Box)

5–10 minutes per child

Step 1: Invite the Child

Say softly: “Let’s put objects inside the box.”

- Carry the tray to the table.

Step 2: Show the Materials

- Point to the objects
 - Point to the hole
- Say: “**Objects go inside.**”

Step 3: Pick One Object

- Use whole hand or fingers
- Hold it up slowly for the child to see

Step 4: Align with the Hole

- Move hand slowly toward the hole
- Pause slightly above the opening (control)

Skills Developed

- Wrist rotation
- Bilateral coordination (using both hands)
- Fine motor control
- Concentration
- Independence

Step 5: Drop the Object

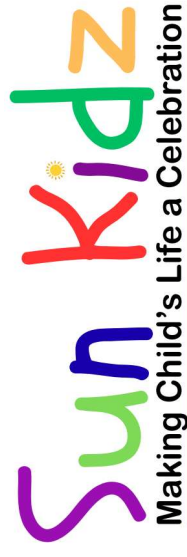

- Release gently into the hole
- Let the child hear the sound inside
- Say: “**In!**”, drop all objects

Step 6: Retrieve Objects

- Open the box or turn it to take objects out
- Show that objects can be used again

Control of Error

- If object misses the hole → child adjusts hand position
- If dropped from height → learns to control movement
- Sound feedback helps child understand success

Area: Practical Life (Motor Skills & Coordination)

Type: Dry Pouring - Rice

Objectives

- Strengthen grasp and finger muscles
- Increase tactile awareness
- Encourage slow, controlled movement
- Develop concentration and patience
- Prepare for grasping, pouring, and scooping activities

Materials Required

- 1 tray with raised edges
- 2 shallow bowls
- A small amount of **dry rice** (½ cup only)
- A cloth for spills

EPL Activity Sheet: Hand Transfer

5–10 minutes per child

Step 1: Invite the Child

- Say gently: “Let’s transfer rice with our hands.”
- Walk to the table together.

Step 2: Show the Setup

- Point slowly: Place bowls on tray
- Bowl with rice
- Bowl without rice
- Touch the rice and say: “This is rice. We will move it.”

Step 3: Full-Hand Grasp

- Open your hand wide.
- Scoop a small handful of rice using **your whole hand**.
- Do not take too much—small quantity teaches control

Skills Developed

- Whole Hand Grasp
- Hand strength
- Concentration
- Sensory awareness (texture, sound)
- Bilateral coordination

Step 5: Transfer to Second Bowl

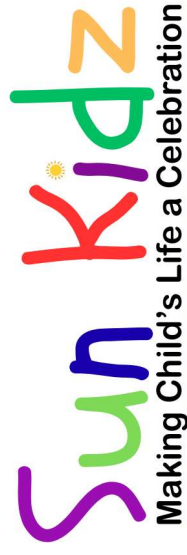

- Move your hand slowly above the second bowl.
- Open your fingers gently.
- Let the rice fall quietly into the bowl.

Step 6: Repeat

- Scoop again with full hand and transfer
- Continue until the first bowl is almost empty.

Control of Error

- Rice spills onto tray
- Child learns finger control through experience
- Tray helps contain mess while allowing self-correction

Area: Practical Life – Hand–Eye Coordination
Type: Dry Transfer

Objectives

- Develop wrist stability
- Strengthen hand muscles
- Improve hand–eye coordination
- Practice controlled movements
- Prepare for self-feeding
- Encourage concentration & independence

Skills Developed

- Fine motor development
- Finger strength
- Slow, controlled movement
- Independence
- Early sorting/pre-math readiness

EPL Activity Sheet: Tripod Grasp - Rajma

(Thumb + Index Finger + Middle Finger)
5–10 minutes per child

Step 1: Invite the Child

- Say softly: “Let’s do tripod grasp with seeds.”

- Place tray on table.

Step 2: Show the Setup

- Point slowly:
- “This bowl has seeds.”
- “This bowl is empty.”
- Touch the seeds gently to introduce texture.

Step 3: Pick One Rajma Seed

- Use **three fingers** (thumb, index, middle).
- Pick **only one seed at a time**.
- Show slow, controlled movement.

Step 4: Transfer to Second Bowl

- Move hand slowly.
- Drop seed gently into bowl.
- Avoid throwing or tapping sound.

Step 5: Continue Slowly

- Transfer each seed one by one.
- Maintain calm pace.
- No talking while demonstrating (Montessori principle).

Step 6: Transfer Back

- Say: “**Now we put them back.**”
- Move each seed back to the first bowl.

Materials Required

- Use simple, child-safe items:
- 1 tray
- 2 small bowls (one filled, one empty)
- 1 toddler-safe spoon
- 10 to 15 Rajma beans

Control of Error

- Seeds outside the bowl
- Seeds left behind
- Sound of dropping too loud
Child corrects naturally by repeating movement.

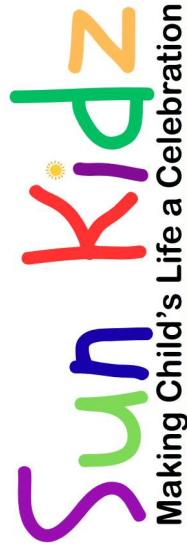

Area: Practical Life Fine Motor Skills & Coordination
Type: Dry Transfer

Objectives

- Strengthen finger and hand muscles
- Improve hand-eye coordination
- Encourage slow and careful movements
- Build concentration
- Prepare for spooning and pouring activities

Materials Required

- 1 tray
- 2 small bowls
- 10–15 **Rajma beans** (washed and dried)
- 1 small cloth
- Small cloth for cleaning

EPL Activity Sheet: Spoon Transfer : Rajma

5–10 minutes per child

Step 1: Invite the Child

- Say:
“**Let’s use a spoon to move the objects.**”
- Carry tray to the table calmly.

Step 2: Show the Setup

- Point and name:
• “**Full bowl.**”
- “**Empty bowl.**”
- “**Spoon.**”

Step 3: Hold the Spoon Correctly

- Hold spoon with dominant hand: Thumb on top
- Fingers supporting side
- Wrist straight, Show slowly and clearly.

4. Scoop Material

- Bring spoon to full bowl, Scoop *one spoonful*
- Do not overload, Lift spoon slowly

Say softly: “**Scoop... lift.**”

Skills Developed

- Wrist stability, Hand control
- Concentration, Bilateral coordination
- Early feeding skills
- Order & independence

Step 5: Transfer to the Empty Bowl

- Move spoon steadily
 - No shaking
 - Reach above the empty bowl
 - Gently tilt spoon to drop items
- Say: “**Drop.**”

Step 6: Repeat Slowly

- Demonstrate scooping and dropping each spoonful with slow, calm movements.

Control of Error

- Seeds outside the bowl
 - Seeds left behind
 - Sound of dropping too loud
- Child corrects naturally by repeating movement.

Area: Practical Life – Control of Movement

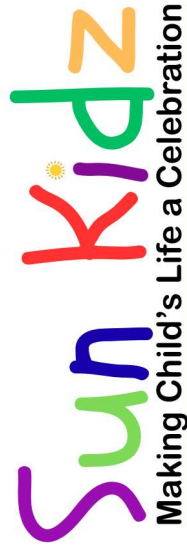

Type: Pouring Activity

Objectives

- Develop wrist control and rotation
- Improve hand–eye coordination
- Teach slow, controlled movement
- Build concentration and patience
- Prepare for independent drinking/pouring

Materials Required

- 1 tray (with raised edges)
- 2 small **unbreakable glasses** (Transparent plastic Glass)
- Small amount of water ($\frac{1}{4}$ glass only – Use less water)
- Small cloth or sponge

EPL Activity Sheet: Water Transfer (Glass to Glass) 3 to 5 minutes per child

Step 1: Invite the Child

- Say softly:
“Let’s pour water.”
- Carry tray carefully to the table.

Step 2: Show the Setup

- Point and name:
“Water glass”
“Empty glass”

Step 3: Hold the Glass

- Use **both hands**
- One hand holds the glass
- Other hand supports (if needed)
- Keep elbows close to body

Skills Developed

- Wrist rotation, Hand stability
- Eye-hand coordination
- Concentration
- Independence
- Care of environment

Step 4: Start Pouring

- Slowly tilt the glass
- Watch water flow
- No shaking

Say: “**Slowly... pour.**”

Step 6: Stop Pouring

- When water is transferred,
- Slowly bring glass back upright
- Say: “**Stop.**”
- Place the glass down, wipe the spills

Control of Error

- Spilling → child learns to pour slowly
- Over-tilting → learns control
- Missing glass → improves aim

Area: Practical Life + Motor Skills

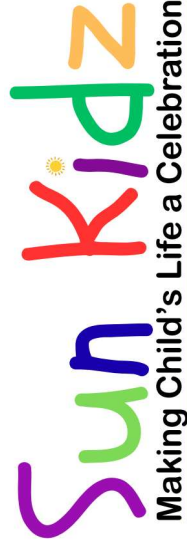

Type: Sorting Activity

Objectives

- Identify and differentiate two colors
- Improve hand-eye coordination
- Develop full-hand or pincer grasp (depending on child)
- Build concentration
- Encourage independence and order

Materials Required

- 1 tray
- 2 bowls of the **same size**
- 1 central bowl containing:
- **Two colors of bottle lids** (e.g., Red & Yellow, Blue & Green)
- Color dots under each bowl
- Small cleaning cloth

EPL Activity Sheet: Color Sorting

3 to 5 minutes per child

Step 1: Invite the Child

- Say gently:
- **“Let’s sort colors.”**
- Carry tray carefully to the table.

Step 2: Show the Materials

Point and say:

- **“This bowl has two colors.”**
- **“This bowl is for red.”**
- **“This bowl is for yellow.”**
- **(Replace with your chosen colors)**

Keep it simple—no long explanations.

Step 3: Identify Colors Slowly

Pick one lid: **For RED** Hold lid up slowly say: **“Red.”** Place it in the red bowl

For Blue, Hold lid up Say: **“blue”**

- Place it in the blue bowl

Skills Developed

- Color recognition (red vs blue)
- Sorting & classification
- Concentration
- Fine motor control
- Eye-hand coordination
- Orderliness

Step 4: Start Sorting

Demonstrate 2–3 lids:

- Pick one lid, Look at the color
- Place in the matching bowl

Say softly: **“Red here... blue here.”**

Step 5: Completion

After sorting:

- Pour all back into the central bowl
- Stack bowls
- Keep tray neatly on the shelf

Say: **“All done.”**

Control of Error

- Wrong color is visually obvious
- Lids too big to swallow → safe
- Sorting gives instant feedback
