

Area: Practical Life (Care of Environment & Motor Skills)

Type: Water Activity

Objectives

- Develop hand and finger strength (pre-writing skill)
- Improve hand–eye coordination
- Build concentration and focus
- Introduce control of movement
- Encourage independence and responsibility

Materials Required

- 2 small bowls (one filled with water–Use coloured water, one empty)
- 1 soft medium-sized sponge
- 1 tray (to contain spills)
- 1 small cloth or towel

EPL Activity Sheet: Sponge Squeezing

5–10 minutes per child

Step 1: Invite the Child

- Call the child calmly
- Say: “Let’s do *sponge Squeezing*.”

Step 2: Show the Setup

- Place tray neatly on the table
- Point to bowls: one with water, one empty

Step 3: Pick the Sponge

- Slowly take sponge from water bowl
- Hold it above the empty bowl

Step 4: Squeeze the Sponge

- Squeeze sponge using fingers/palm
- Let water fall into empty bowl
- Say: “Squeeze... *water comes out*.”

Step 5: Release

- Stop squeezing
- Show relaxed hand

Step 6: Repeat

- Put sponge back into water bowl
- Repeat 3–5 times slowly

Control of Error

- Water spills → child learns to control pressure
- No water comes → child learns to dip sponge again

Skills Developed

- Fine motor development
- Wrist control
- Concentration
- Independence
- Care for environment

Area: Practical Life – Fine Motor, Independence
Type: Manipulative Activity

Objectives

- Strengthen hand muscles
- Develop wrist rotation
- Improve finger control and coordination
- Introduce independence skills (opening their own snack boxes, containers)
- Build concentration through repetition

Materials Required

- Water bottle – ½ liter mineral water-empty
- Push to open – children water bottle
- Flip lid (simple hinge) - Children water bottle

EPL Activity Sheet: Opening & Closing simple lids

5–10 minutes per child

Step 1: Invite the Child (Teacher to open)

- Say: “Let’s open and close the lids.”
- Carry tray to the table.

Step 2: Show the First Container

- Place it in front of the child.
Hold it with one hand and open the lid **slowly** with the other and take it out- don’t pull

Step 3: Closing Motion

- Align lid carefully
- Turn the lid to close, make sure the child observes how lid sits on top
- Say: “Close.”

Step 4: Show the Second Container

- Place it in front of the child.
- Hold it with one hand and press the lid **slowly** with the other and close

Skills Developed

- Wrist rotation
- Bilateral coordination (using both hands)
- Fine motor control
- Concentration
- Independence

Step 5: Show the Third Container

- Place it in front of the child.
- Hold it with one hand and flip the lid **slowly** with the other and close

Step 6: Child’s Turn

Offer the container and let the child try. If child struggles:

- Show again slowly
- Do NOT fix hand positions forcibly

Encourage: “Try slowly.”

Control of Error

- Lid does not fit → child realizes and corrects alignment
- Lid falls → child learns grip control
- Container moves away → child learns to stabilize with other hand

Area: Practical Life – Hand Control & Coordination
Type: Posting Activity

Objectives

- Develop hand-eye coordination
- Improve grasp and release control
- Build concentration and focus
- Encourage independence
- Introduce cause & effect (object goes in → disappears inside)

Materials Required

- 1 posting box with **big hole** (or a container with wide opening)
- Blocks, Bead Balls, Counting Rings-5 nos (Multicolors)
- 1 tray

EPL Activity Sheet: Object Posting (Big-Hole Box)

5–10 minutes per child

Step 1: Invite the Child

Say softly: “Let’s put objects inside the box.”

- Carry the tray to the table.

Step 2: Show the Materials

- Point to the objects
 - Point to the hole
- Say: “**Objects go inside.**”

Step 3: Pick One Object

- Use whole hand or fingers
- Hold it up slowly for the child to see

Step 4: Align with the Hole

- Move hand slowly toward the hole
- Pause slightly above the opening (control)

Skills Developed

- Wrist rotation
- Bilateral coordination (using both hands)
- Fine motor control
- Concentration
- Independence

Step 5: Drop the Object

- Release gently into the hole
- Let the child hear the sound inside
- Say: “**In!**”, drop all objects

Step 6: Retrieve Objects

- Open the box or turn it to take objects out
- Show that objects can be used again

Control of Error

- If object misses the hole → child adjusts hand position
- If dropped from height → learns to control movement
- Sound feedback helps child understand success

Area: Practical Life (Motor Skills & Coordination)

Type: Dry Pouring - Rice

Objectives

- Strengthen grasp and finger muscles
- Increase tactile awareness
- Encourage slow, controlled movement
- Develop concentration and patience
- Prepare for grasping, pouring, and scooping activities

Materials Required

- 1 tray with raised edges
- 2 shallow bowls
- A small amount of **dry rice** (½ cup only)
- A cloth for spills

EPL Activity Sheet: Hand Transfer

5–10 minutes per child

Step 1: Invite the Child

- Say gently: “Let’s transfer rice with our hands.”
- Walk to the table together.

Step 2: Show the Setup

- Point slowly: Place bowls on tray
- Bowl with rice
- Bowl without rice
- Touch the rice and say: “This is rice. We will move it.”

Step 3: Full-Hand Grasp

- Open your hand wide.
- Scoop a small handful of rice using **your whole hand**.
- Do not take too much—small quantity teaches control

Skills Developed

- Whole Hand Grasp
- Hand strength
- Concentration
- Sensory awareness (texture, sound)
- Bilateral coordination

Step 5: Transfer to Second Bowl

- Move your hand slowly above the second bowl.
- Open your fingers gently.
- Let the rice fall quietly into the bowl.

Step 6: Repeat

- Scoop again with full hand and transfer
- Continue until the first bowl is almost empty.

Control of Error

- Rice spills onto tray
- Child learns finger control through experience
- Tray helps contain mess while allowing self-correction

Area: Practical Life – Grace & Courtesy, Gross Motor Coordination

Type: Movement Activity

Objectives

- Develop coordination of movement
- Improve concentration and order
- Build independence and responsibility
- Strengthen gross motor control
- Teach care of classroom materials

Materials Required

- Child-sized floor mat

EPL Activity Sheet: Rolling & Unrolling a Mat

5 minutes per child

Step 1: Invite the Child

- Say: "Let's roll and unroll a mat."
- Walk with the child to the mat shelf.

Step 2: Carrying the Mat

- Hold the rolled mat with both hands.
- Carry it carefully to the work area.
- Place it gently on the floor.

Step 3: Unrolling the Mat

- Kneel beside the mat.
- Hold one end of the mat.
- Slowly unroll it away from your body.
- Smooth the mat using both hands.

Step 4: Using the Mat

- Show the child how to sit or work on the mat.
- Remind the child to stay within the mat area.
- Explain that the mat marks their workspace.

Skills Developed

- Gross motor coordination
- Concentration
- Order and organization
- Independence, Care of environment

Step 5: Rolling the Mat

- Start from one end.
- Roll the mat slowly and tightly.
- Keep the edges aligned while rolling.
- Finish with the mat neatly rolled.

Step 6: Child's Turn

- Invite the child to try.
- Allow independent practice.
- Encourage: "**Roll it slowly and neatly.**"

Control of Error

- Mat is not straight when unrolled.
- Mat becomes loose while rolling.
- Edges do not align properly.
- Child notices and corrects the roll.

Area: Practical Life – Fine Motor, Independence
Type: Care of Self Activity

Objectives

- Develop fine motor coordination
- Strengthen finger muscles
- Improve hand-eye coordination
- Introduce sequencing skills
- Build concentration and independence
- Develop order and neatness

Materials Required

- Small cotton handkerchief (plain or with fold lines)
- Tray

EPL Activity Sheet: Folding a

Handkerchief

5 minutes per child

Step 1: Invite the Child

- Say: "Let's fold the handkerchief."
- Carry the tray to the table.

Step 2: Open the Handkerchief

- Place the handkerchief flat on the table.
- Smooth it gently with both hands.
- Show the child the corners and edges.

Step 3: First Fold

- Hold two opposite corners.
- Bring them together slowly.
- Match the corners carefully.
- Press along the fold line using fingers.

Step 4: Second Fold

- Hold the folded handkerchief.
- Bring the corners together again.
- Align the edges neatly.
- Press the fold gently.

Skills Developed

- Fine motor control
- Hand-eye coordination
- Bilateral coordination
- Concentration
- Wrist control

Step 5: Show the Finished Fold

- Place the folded handkerchief neatly on the tray.

- Pause and allow the child to observe.

- Say: "The handkerchief is folded neatly."

Step 6: Child's Turn

- Invite the child to try.
- Allow independent practice.
- Encourage: "Match the corners carefully."

Control of Error

- Corners do not match.
- Edges are uneven.
- Fold is not straight.
- Child notices and corrects the fold.

Area: Practical Life (Care of Environment)

Type: Grace & Courtesy / Responsibility Skill

Objectives

- Develop independence in daily routines
- Learn to carry a glass carefully
- Improve hand–eye coordination
- Build concentration and balance
- Develop responsibility after drinking water

Materials Required

- Empty glass
- Child-accessible sink

EPL Activity Sheet: Empty Glass to Sink

Group Activity (GABL)

Step 1: Invite the Child

- Say softly: *"Let's put the empty glass in the sink."*
- Walk calmly to the table.

Step 2: Show the Materials

Place the empty glass in front of the child.

Say: *"The glass is empty."*

Step 3: Carrying the Glass

- Hold the glass with both hands
- Walk slowly and carefully to the sink
- Keep the glass upright
- Say softly: *"Carry carefully."*

Skills Developed

- Responsibility
- Hand–eye coordination
- Gross motor control
- Concentration
- Independence
- Care of Environment

Step 4: Placing the Glass in the Sink

- Stand near the sink
- Gently place the glass inside the sink
- Remove hands slowly

Say softly:

"Place... gently."

Repeat whenever an empty glass needs to be returned.

Control of Error

- Glass placed outside the sink → child notices and corrects
- Glass tilted or dropped → child adjusts handling
- Glass left on the table → routine remains incomplete

Area: Practical Life (Care of Environment)

Type: Responsibility Skill (Clean-up Routine)

Objectives

- Develop responsibility after snack or mealtime
- Encourage independence in daily routines
- Improve hand–eye coordination
- Build concentration and order
- Develop care for the environment

Materials Required

- Child-sized plate
- Child-accessible sink
- Serve little food in plate on this day

EPL Activity Sheet: Returning a

Used Plate to the Sink
Group Activity (GABL)

Step 1: Invite the Child

- Say softly:
- "Your snack is finished. Let's take the plate to the sink."

Step 2: Check the Plate

Show the child the empty plate. - "The plate is empty."

Step 3: Carry the Plate

- Hold the plate with both hands.
 - Walk carefully to the sink.
- "Carry carefully."*

Skills Developed

- Responsibility, Hand–eye coordination, Independence
- Gross motor control
- Concentration
- Mealtime etiquette
- Care of Environment

Step 4: Placing the Plate in the Sink

- Stand near the sink
- Gently place the Plate inside the sink
- Remove hands slowly

Say softly:

"Place... gently."

Control of Error

- Food remains on the plate.
- Plate is left on the table.
- Plate is placed outside the sink.
- Plate is dropped or handled roughly.
